We are food & beverage

We provide hygienic, chemical resistant, anti-slip flooring solutions with proven track records through our brands RSL and General Polymers. Our industry leading systems have been installed at many of the world's leading corporations including: Cadbury, Coca-Cola, McVities, Pepsi and Unilever.

We are trusted

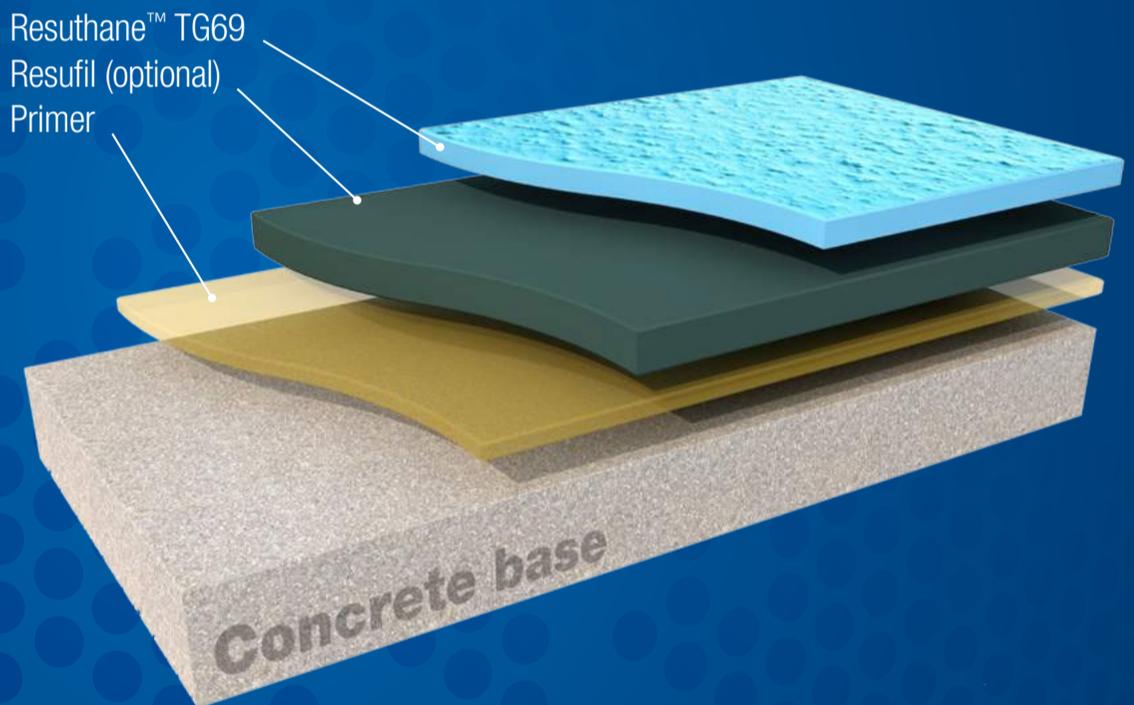

Our unparalleled **Resuthane™** formulation has been tried and tested for over 16 years. In fact it is so good that we are still using the original formulation today.

With an exceptional track record, you can be sure that **Resuthane™** is the ideal choice for the most demanding food processing and industrial environments.

Resuthane™ TG69 flooring system

Features

- Slip resistant
- Hygienic; does not harbour bacteria
- High chemical resistance
- Resistant to hot water and steam cleaning
- Self-sealing
- Matt finish
- Extremely hard wearing
- Non-taint (tested by Campden BRI)
- Seamless
- Non-dusting.

BILLINGSGATE
CASE STUDY

Case study – Resuthane™ TG69 – Billingsgate Market

Bespoke flooring at the UK's largest inland fish market has reached its six year milestone thanks to RSL. Served by almost every port in the country, an average of 25,000 tonnes of fish and fish products are sold through merchants at Billingsgate Market in Canary Wharf each year.

Requirements

Covering 13 acres, the ground floor of the building comprises a large trading hall with 98 stands and 30 shops, as well as a number of individual cold rooms and an 800 tonne freezer store maintained at -26°C.

Outcome

Martin Macleod, Superintendent at Billingsgate, who oversaw the project, said: “We needed a rapid solution that was not only fit for purpose but wouldn't impact on the day to day operations at the Market and could stand the test of time. Six years later, I can confidently say RSL met the brief brilliantly”.

Martin Wroe, Business Development Manager at RSL explained: “Customers, especially within the food industry, require a flooring solution that will stand the test of demanding environments. We worked closely with The Corporation of London and the installation team to ensure we could provide the best specification for such an iconic landmark”.

Solution

RSL supplied a **Resuthane™ TG69** in a Forest Green colour on the ground floor of the self-contained Market complex.

RSL's leading hygienic **Resuthane™ TG69** system was chosen because it is a food-safe, seamless floor which combines outstanding wearing and anti-slip properties in both wet and dry conditions.

Case study – Resuthane™ TG69 – KP Nuts

KP Snacks' new nut processing and packing facility opened in autumn 2014. It covers 8,500 square metres and will produce all of KP's volume of nuts and nut snacks.

Requirements

For the project, RSL was required to meet an exacting hygiene and safety standards brief and to supply and install a durable, hard wearing, easy-to-clean, chemical and slip-resistant surface finish.

Solution

RSL's **Resuthane™ TG69** product was recommended as it is a heavy-duty polyurethane screed, with a matt-textured finish, suitable for use on large-scale production facilities.

Outcome

Dale Banton, Regional Sales Manager at RSL, said: "This is an exciting project for a world famous brand and we are delighted to be working on it. **Resuthane™ TG69** is the ideal solution for KP Snacks' new factory as it ticks all the boxes in terms of food safety, slip-resistance and durability."

We are innovative

Elladur™ is a game changing new product range created using polyaspartic technology. Providing a solution that boosts efficient delivery, greener solutions and innovative design like no other product on the market.

Elladur™ reduces installation time from days to just a few hours, fulfilling the need for a quick turnaround and minimal disruption to operations.

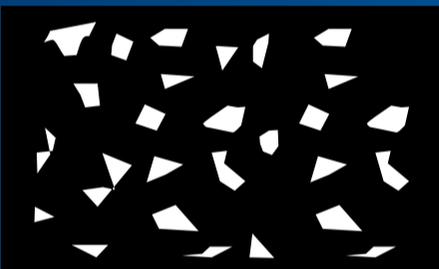

Elladur™ product range

Elladur SF

Clear and coloured fast curing materials

A high build polyaspartic fast cure floor coating system, designed to provide a tough and durable gloss finish in a variety of thicknesses.

Elladur Deco FL

Fast track decorative flake system

A multicomponent polyaspartic fast cure floor system which utilises coloured flakes to provide a decorative flooring system.

Elladur Deco BC

Fast track decorative broadcast system

A multicomponent polyaspartic fast cure floor system which utilises coloured quartz aggregates to provide a decorative flooring finish.

Elladur LM

Fast track line marking material

A high build polyaspartic fast cure line marking coating, designed to provide a tough and durable, coloured gloss floor finish in a range of thicknesses. Light stable with very good chemical resistance and can be applied to a variety of finishes and surfaces. Additional slip resistance can be created by incorporating suitable aggregates.
